

### Some basic chords:

At the top of each chord diagram you will see Xs and Os. When you strum your guitar to play these chords, you play the numbered strings and all strings marked with an O (open strings). Strings marked with an X are not to be played within that chord.

The numbered strings correspond with the fingers on your left hand, as shown here to the left.

This is not a complete list of chords available, merely a summary of the most popular beginner chords.
